Torrance, CA | (310) 989-2905 | nadeau.jonny@gmail.com | linkedin.com/in/nadeau-jonathan | github.com/nadeaujonny

Portfolio Website: nadeaujonny.github.io

SUMMARY

Data analyst who turns undocumented, messy operational data into tools people use. Currently building a failure-analysis search application over a 19-year, 4,000-record hardware defect archive at a defense electronics manufacturer, where a data-quality audit I ran redirected the project off a reporting plan built on empty fields. UCSB mathematics graduate, Google Data Analytics certified, UCLA Extension Data Science Certificate in progress.

TECHNICAL SKILLS

Databases & SQL: Oracle 19c, BigQuery, MySQL, SQLite · CTEs, window functions, stored procedures, DDL/DML, star-schema design

Excel & Modeling: Power Query (custom M), Power Pivot, DAX, pivot tables, dynamic arrays, Solver, FORECAST.ETS, three-statement modeling, scenario & sensitivity analysis

BI & Visualization: Power BI (DAX, star schema, RLS, drillthrough), Tableau, Looker Studio

Programming: Python (pandas, NumPy, scikit-learn, Streamlit, regex/text extraction), R (tidyverse), PowerShell, Git/GitHub, GitHub Actions

Data Engineering & QA: REST API extraction, JSON parsing, ETL pipeline design, data profiling, validation sampling, false-positive analysis, regression diffing

Professional: Requirements gathering, scope negotiation, technical documentation, stakeholder reporting · ITAR-eligible

EXPERIENCE

Data Analyst Intern · Escape Communications

July 2026 – Present · Torrance, CA

Defense/telecom electronics manufacturer · ITAR-eligible environment · Sole developer

- Audited data quality across 4,038 hardware failure records (2007–2026) in an undocumented legacy issue tracker; found the root-cause field absent entirely, 43% of records structurally unable to carry a failure category, and one required field defaulted in 80% of entries – redirecting an eight-week dashboard roadmap that would have been built on data that did not exist.
- Reverse-engineered the undocumented data model via REST API JSON extraction, consolidating results into a denormalized 4,038-row analytical table serving two search interfaces.
- Designed a Python regex and dictionary extraction pipeline indexing ~2,245 component reference designators out of free-text engineering comment threads, making 19 years of failure history searchable by component for the first time.
- Validated accuracy prefix by prefix through manual review of 500+ records plus full-corpus scanners, cataloguing eight collision classes; found and fixed a defect causing a 68–71% false-positive rate, verifying via full-corpus output diffing.
- Reconciled conflicting stakeholder requirements into a documented, locked scope; maintained an append-only build log and runbook enabling clean handoff.

Lab Technician · Escape Communications

June 2017 – August 2025 · Torrance, CA

- Performed QA testing and calibration on power supply units, recording multimeter measurements into Excel tracking systems using conditional formatting and logical formulas to auto-flag out-of-tolerance values.
- Tracked component inventory across product lines with automated low-count flagging; assembled hardware units and tested completed boards for functional compliance before release.

Mathematics Tutor & Teaching Assistant · Mr. J's Academy · Wyzant · Blue Train College Prep · UCSB

2022 – 2025 · Torrance & Goleta, CA

- Delivered 1,500+ hours of instruction across Algebra 1 through Calculus and SAT prep for 17+ students; promoted to high school lead at Mr. J's Academy with a 50% pay increase as staff mathematics specialist.
- Maintained 100% client retention and a 4.8-star Wyzant rating across 7 ongoing clients; diagnosed knowledge gaps and designed targeted problem sets, driving referral growth.
- Completed 130 hours of supervised classroom fieldwork at Dos Pueblos High School under UCSB Education faculty.
- Substitute taught for Torrance Unified School District (2024), managing classes of 25–35 students across elementary through high school on short notice.

EDUCATION & CERTIFICATIONS

University of California, Santa Barbara · B.A. Mathematics; Minor, Secondary Math & Science Education

Sept 2018 – Mar 2023

3.40 cumulative GPA · 3.49 major GPA · 4x Dean's Honors · Coursework: Probability & Statistics I–II, Linear Algebra, Real Analysis, Combinatorics, Object-Oriented Design

UCLA Extension · Data Science Certificate (in progress)

June 2026 – Dec 2026

Python, R, SQL, Tableau, Spark, scikit-learn · EDA, big data management, machine learning

Google Data Analytics Professional Certificate · Coursera

Oct 2025 – Jan 2026

All 9 courses completed with a 100% average

CSU Long Beach · Single Subject Mathematics Credential coursework

Aug 2024 – Oct 2025

4.00 GPA · Includes 10 weeks of student teaching (Algebra 1 & 2), South High School

SELECTED PORTFOLIO PROJECTS – full portfolio at nadeaujonny.github.io

Supply Chain Forecasting & MRP Simulation | Oracle SQL · Excel · Power BI · 180K orders – Automated pipeline with scheduled Oracle stored procedures, Power Query ETL, ABC/XYZ classification, ETS/WMA forecasting, and a six-page star-schema dashboard. Diagnosed a structural 42.7% on-time delivery rate, premium shipping tiers worst.

Skechers FP&A Three-Statement Model | Excel · SEC 10-K filings – Income statement, balance sheet, and cash flow driven by Bear/Base/Bull scenarios with sensitivity tables and a KPI dashboard; all audit checks passing.

Additional projects | College Match Finder (Python/Streamlit, 12 federal data sources), ML churn prediction, BigQuery e-commerce analysis, Power BI healthcare dashboard, Tableau marketplace ops, USAJobs API pipeline – all documented at nadeaujonny.github.io.
