Torrance, CA | (310) 989-2905 | nadeau.jonny@gmail.com | linkedin.com/in/nadeau-jonathan | **Portfolio:** nadeaujonny.github.io

Data Analyst | SQL • Python • Excel • Power BI | Data Quality, Reporting & Process Automation

SUMMARY

UCSB Mathematics graduate working as the sole data and application developer at a Torrance defense and telecom electronics manufacturer, where I have shipped 9 internal tools used by engineering, quality, and operations staff. I audit messy, undocumented data and turn manual spreadsheet work into repeatable, verified reporting. Clear communicator with 1,500+ hours of teaching. ITAR-eligible.

PROFESSIONAL EXPERIENCE

Escape Communications

Torrance, CA

Data Analyst & Application Developer

Jul 2026 – Present

- Sole developer of 9 shipped internal data tools (Python, pandas, Excel, SQL, REST APIs), each delivered as a double-click Windows app with a written user manual; gathered requirements directly from the VP of Engineering and end users.
- Reverse-engineered six undocumented ISO 9001 quality reports from 20 historical workbooks and 16 database tables, reproducing four years of results exactly; identified four material errors in the audit record, including a figure overstated 3.4x and carried forward two years.
- Built a searchable Streamlit app over 4,038 hardware failure records (2007–2026) that no one could query; used Python and regex to extract 2,245 component IDs from 13,252 free-text comments, auditing every match class against the full dataset to remove false positives.
- Turned 19 years of unindexed test-station logs (440 MB, 360,000 records, 3 undocumented formats) into on-demand reports by part number or date range, with a reconciliation check proving every input line is accounted for; the analysis also surfaced an unnoticed equipment issue.
- Automated bill-of-materials review: a checker that flags 12 defect types across part lists (427 automated tests) and a sourcing tool that prices every part against live DigiKey and Mouser APIs to estimate build cost, availability, and obsolescence risk.
- Replaced manual spreadsheet reconciliation with tools that merge dated inventory counts into a single audit log and identify parts shared across multiple boards to inform purchasing; delivered one from requirements to deployment in a single day.
- Automated manual engineering checks: a validator that pinpoints data mismatches in FPGA test captures and a generator that builds Word documentation from the JSON that drives existing C++ code.

Escape Communications

Torrance, CA

Lab Technician (Seasonal)

Summers 2017 – 2025

- Performed QA testing and calibration on power supply units, recording measurements in Excel trackers built with conditional formatting and logic formulas to auto-flag out-of-tolerance values; assembled hardware, tracked inventory, and tested boards before release.

Mr. J's Academy, Wyzant, Blue Train College Prep, Torrance Unified School District

Torrance, CA

Mathematics Instructor, Tutor & Substitute Teacher

Jun 2022 – Jun 2025

- Delivered 1,500+ hours of math instruction; promoted from middle school tutor to high school lead tutor at Mr. J's Academy with a 50% pay increase.
- Maintained 100% client retention and a 4.8-star rating on Wyzant; managed classrooms of 25–35 students as a substitute teacher.

SKILLS

Data & SQL: SQL (MySQL, BigQuery, Oracle, MS Access), data cleaning, validation, and reconciliation, ETL, REST APIs

Analysis: Python (pandas, NumPy, scikit-learn, Streamlit), R, statistics, A/B testing, forecasting, Git

Excel & BI: Excel (Power Query, Power Pivot, pivot tables, XLOOKUP, financial modeling), Power BI (DAX), Tableau, Looker Studio

EDUCATION & CERTIFICATIONS

University of California, Santa Barbara B.A. Mathematics; Minor, Secondary Math & Science Education

2023

GPA 3.40 (Math 3.49); four-time Dean's Honors. Coursework: Probability & Statistics I–II, Linear Algebra, Object-Oriented Design.

UCLA Extension Data Science Certificate (in progress)

Expected Dec 2026

Google Data Analytics Professional Certificate (100% average across 9 courses)

2026

California State University, Long Beach Teaching Credential Coursework, Mathematics (4.0 GPA)

2024 – 2025

SELECTED PROJECTS (15 total at nadeaujonny.github.io)

- **Supply Chain Analytics** (Oracle SQL, Power Query, Power BI): forecasting, ABC/XYZ classification, and MRP simulation on 180K orders; found 42.7% on-time delivery.
- **Skechers FP&A Model** (Excel): three-statement model from 10-K data with Bear/Base/Bull scenarios and sensitivity tables.
- **Customer Churn Prediction** (Python, scikit-learn, XGBoost): compared 5 models (0.83 AUC); deployed a Streamlit scoring app.
