Torrance, CA – nadeau.jonny@gmail.com – (310) 989-2905 – [linkedin.com/in/nadeau-jonathan](https://www.linkedin.com/in/nadeau-jonathan) – github.com/nadeaujonny

Portfolio Website: nadeaujonny.github.io

Summary: Mathematics graduate transitioning from education to data analytics. Google data analytics-certified. Throughout my journey of developing and demonstrating data analytics proficiency I have strived to maintain a balance between internalizing critical knowledge, developing key skills, and being the origin of analytical decisions and insights; but also using the resources available to me to efficiently produce quality output. I use standard data analysis tools and work with diverse and relevant data.

Technical Skills: **SQL** (Oracle SQL, BigQuery, MySQL, Filtering, Grouping, Aggregating, Joins, String Functions, Date Functions, CTE's, Subqueries, CASE Statements, Window Functions, DDL/DML, Stored Procedures, Views), **Spreadsheets** (Excel, Google Sheets, Sorting, Filtering, Formulas, Functions, Cell Referencing, Conditional Formatting, Pivot Tables, Visualizations, Power Query, Power Pivot), **Dashboard Tools** (Tableau, Power BI, Looker Studio), **AI** (LLM's, Coders)

Experience

Mr. J's Academy (Private School) | Teaching Assistant | September 2023 – June 2025 | Torrance, CA

Academic assistant for all subjects. Specialized in math. Designed and delivered lessons. Motivated students. Promoted from middle school assistant to lead of high school. Managed students' learning, schedules, meetings, deadlines, and productivity.

Blue Train College Prep | Math Tutor and SAT Prep Specialist | June 2023 – February 2025 | Torrance, CA

Alg 2, Precalc, Precalc H, AP Calc AB. SAT prep. Across 9 students. 78% client-retention rate. 109 working hours.

Wyzant | Math Tutor | February 2024 – May 2025 | Torrance, CA

Geometry, Alg 2, Precalc, Calculus. 4.8 star rating. Across 6 students. 100% client-retention rate. 91 working hours.

Escape Communications | Lab Technician | Summers of 2017 – 2023, and 2025 | Torrance, CA

Calibrated power supplies using Excel spreadsheets. Tested boards. Assembled units. Tracked inventory.

Education

University of California, Santa Barbara | B. A. in Mathematics Concentration II (High School Teaching) + Minor in Secondary Math and Science Education | September 2018 – March 2023 | UCSB Educational Pre-Professional Program 130 hours | 3.4 GPA

California State University, Long Beach | SSCP Mathematics | August 2024 – October 2025 | 4.0 GPA for Coursework

Google Data Analytics Professional Certificate | Coursera | 100% score

South High School | September 2014 – June 2018 | 4.4 GPA

Portfolio Projects

SQL E-commerce Business Optimization Analysis – BigQuery, thelook_ecommerce dataset. Top and bottom performing products/brands/categories by key metrics. Long term and seasonal trends. Customer loyalty and segments. Operations metrics.

Excel Retail Sales Analysis and Dashboard – Superstore dataset. Power Query cleaning. Sales and profit trends. Product and category performance. Regional performance. Customer segments. Returns and revenue impact. Profit-oriented dashboard.

Tableau Operations, Performance, and Customer Experience Analyses and Dashboards – Olist E-commerce dataset. Order fulfillment. Revenue and sales. Customer experience. Product/category/seller performances. Executive summary with KPI's.

Power BI Healthcare Analysis and Dashboards – CDC U.S. CDI dataset. Power Query ETL. Dim tables to star schema. DAX measures. Indicator trends by region/overtime. Deep dives by state. Disparities by demographic. State-priority ranked for action.

SQL Data Cleaning and Transformation – Nashville Housing dataset. MySQL. Converted dates to date data type. Populated blank addresses using parcel id's. Trimmed strings. Deduplicated. Dropped unused columns. Created view and stored procedure.

Looker Studio/SQL Cohort Retention Analysis and Dashboards – BigQuery, thelook_ecommerce. Cohort sizing. Retention rates. Revenue by cohort. Retention by channel. Metrics by lifecycle segment. Revenue by period and customer lifetime value.

SQL/Excel/Power BI Supply Chain Analysis – Oracle. DataCo Smart Supply Chain dataset. Data loaded into Oracle then used SQL to create views to load into Excel. Demand forecasting, ABC/XYZ classes, inventory optimization. Executive dashboards.

Python Financial Analysis – Jupyter Notebook. 10 years of market data across 6 assets retrieved via yfinance API. Asset values versus time plotted on line graph. Returns/volatilities/correlations analyses. Long term and seasonal time series decomposition.

R A/B Testing and Experimentation – RStudio. 10,000 users data simulated/generated 50/50 random assignment to control/treatment. Metrics being conversion rate and time to complete. Measurable differences between groups for metrics.

Python Job Market API Pipeline – VS Code. USAJobs Search API. GitHub actions. 4 stage python script ETL (collect, transform, load, app). 4 Streamlit dashboards updated daily (overview, salary analysis, geographic demand, agency analysis).

Python Customer Churn Prediction Model – VS Code. Telco Customer Churn dataset. 5 python notebook pipeline. Preliminary churn analysis. Trained and compared 5 models. Loaded best model to live Streamlit app. Can be used by user.

Julius AI Health Data Analysis – CDC U.S. CDI dataset. Uploaded CSV, then conducted 6 analyses via natural language prompts. Diabetes by state, asthma by race, inactivity/heart-disease correlation, mental health by gender, smoking, obesity trend.
