

Jonathan Nadeau

Data analyst who builds the fix, not just the report

THREE PROBLEMS I SOLVED

Code specs no one could read quickly

PROBLEM

Engineers verified command interfaces by reading raw JSON, and Word docs were written by hand.

WHAT I DID

Built PAMDocGen, which turns the JSON behind the C++ code into Word tables. Our CTO uses it.

139

tests, checked against a hand-built reference

Logs stuck on one computer

PROBLEM

19 years of test logs in 3 undocumented formats, sitting on one lab PC.

WHAT I DID

Built on-demand reports and moved the data to shared storage so anyone can run them.

360K

records reconciled, one equipment issue surfaced

Failure history no one could search

PROBLEM

4,038 hardware failure records with part references buried in free text.

WHAT I DID

Regex extraction checked by hand, served in a Streamlit search app.

2,245

component IDs pulled from 13,252 comments

EXPERIENCE

Data Analyst & Application Developer · Escape Communications, Torrance

Jul 2026 - Present

- Sole analyst and developer for engineering, quality, and operations: 12 tools built, tested, deployed, and documented with user guides.
- Rebuilt six undocumented ISO 9001 reports from 20 workbooks and 16 database tables, reproduced four years exactly, and found four material errors, one overstated 3.4x.
- Automated bill-of-materials review with a 12-defect checker (427 automated tests) and a sourcing tool on the DigiKey and Mouser APIs.
- Built an executive dashboard for the VP of Engineering on open orders, shipments, and time-sensitive contract items.
- Build with AI under a spec-first, test-verified workflow, processing sensitive, export-controlled data locally.

Lab Technician (Seasonal) · Escape Communications

Summers 2017 - 2025

- QA testing and calibration tracked in Excel, with formulas that auto-flagged out-of-tolerance results.

Mathematics Instructor & Tutor · Mr. J's Academy, Wyzant, Torrance USD

2022 - 2025

- 1,500+ hours explaining technical ideas; promoted to lead tutor with a 50% raise; 100% client retention.

PORTFOLIO

- **A/B Testing Pipeline (R)** · **Churn Prediction App** (Python, XGBoost, Streamlit, 0.83 AUC) · **Cohort Retention** (BigQuery, Looker Studio) · **Supply Chain Analytics** (Oracle SQL, Power BI) · 18 projects at nadeaujonny.github.io

SKILLS

SQL: BigQuery, MySQL, Oracle, MS Access

Python: pandas, NumPy, scikit-learn, Streamlit

BI: Power BI, Tableau, Looker Studio, Excel

Also: R, Git, pytest, REST APIs, Claude Code

EDUCATION

UC Santa Barbara, B.A. Mathematics · 2023

UCLA Extension, Data Science Certificate · Dec 2026

Google, Data Analytics Certificate · 2026
