Portfolio Website: nadeaujonny.github.io

Summary: Data analyst with a mathematics degree (UC Santa Barbara), Google Data Analytics certification, and AI tool proficiency. 12 projects spanning SQL, Excel, Tableau, Power BI, Looker Studio, Python, and R – including end-to-end supply chain analysis, ML churn prediction, automated ETL pipelines, e-commerce business optimization, cohort retention analysis, A/B testing, financial risk analysis, healthcare analytics, and retail sales dashboards. Background in math education brings strong communication skills for translating analytical findings to non-technical stakeholders and presenting strategic insights to cross-functional teams.

Technical Skills: **SQL** (Oracle SQL, BigQuery, MySQL, CTEs, Window Functions, Stored Procedures, DDL/DML), **Spreadsheets** (Excel, Google Sheets, Pivot Tables, Power Query, Power Pivot, DAX, Conditional Formatting), **BI & Visualization** (Tableau, Power BI, Looker Studio), **Programming** (Python, R, Streamlit), **AI Tools** (Claude, Claude Code, ChatGPT, Codex, Gemini)

Experience

Mr. J's Academy (Private School) | Teaching Assistant | September 2023 – June 2025 | Torrance, CA

Assisted with all subjects. Top math expert among staff. Designed and delivered lessons. Promoted from middle school assistant to lead of high school. Managed students' learning, schedules, meetings, deadlines, and productivity. Tracked student progress.

Blue Train College Prep | Math Tutor and SAT Prep Specialist | June 2023 – February 2025 | Torrance, CA

Alg 2, Precalc, Precalc H, AP Calc AB. SAT prep (reading, writing, and math). Across 9 students. 78% client-retention rate.

Wyzant | Math Tutor | February 2024 – May 2025 | Torrance, CA

Geometry, Alg 2, Precalc, Calculus. 4.8 star rating. Across 6 students. 100% client-retention rate. Remote and In-Person settings.

Escape Communications | Lab Technician | Summers of 2017 – 2023, and 2025 | Torrance, CA

Calibrated power supplies using Excel. Tested boards. Assembled units. Tracked inventory. Technical communication with engineers.

Private Tutor | February 2024 – Present | Palos Verdes, CA

2 clients. 2-year retention. 25% pay raise. Middle School and High School math. Tailored instruction to individual learning gaps.

Education

University of California, Santa Barbara | B. A. in Mathematics + Minor in Secondary Mathematics and Science Education | UCSB Educational Pre-Professional Program | September 2018 – March 2023 | 3.4 GPA (3.5 Major GPA) | 4x Dean's Honors

California State University, Long Beach | Single Subject Credential Program for Mathematics | Student Teaching | August 2024 – October 2025 | 4.0 GPA for Coursework

Google Data Analytics Professional Certificate | Coursera | October 2025 – January 2026 | 100% score across all 9 courses
4.4 High School GPA | 1440 SAT | 800 on Math II SAT Subject Test | 5 on AP Calculus BC Exam | 5 on AP Chemistry Exam

Portfolio Projects

SQL E-commerce Business Optimization Analysis – BigQuery, thelook_ecommerce dataset. Top and bottom performing products/brands/categories by key metrics. Long-term and seasonal trends. Customer loyalty and segments. Operations metrics.

Excel Retail Sales Analysis and Dashboard – Superstore dataset. Power Query cleaning. Sales and profit trends. Product and category performance. Regional performance. Customer segments. Returns and revenue impact. Profit-oriented dashboard.

Tableau Operations, Performance, and Customer Experience Analyses and Dashboards – Olist E-commerce dataset. Order fulfillment. Revenue and sales. Customer experience. Product/category/seller performances. Executive summary with KPIs.

Power BI Healthcare Analysis and Dashboards – CDC U.S. CDI dataset. Power Query ETL. Dim tables to star schema. DAX measures. Indicator trends by region/over time. Deep dives by state. Disparities by demographic. State-priority ranked for action.

SQL Data Cleaning and Transformation – Nashville Housing dataset. MySQL. Converted dates to date data type. Populated blank addresses using parcel IDs. Trimmed strings. Deduplicated. Dropped unused columns. Created view and stored procedure.

Looker Studio/SQL Cohort Retention Analysis and Dashboards – BigQuery, thelook_ecommerce. Cohort sizing. Retention rates. Revenue by cohort. Retention by channel. Metrics by lifecycle segment. Revenue by period and average customer lifetime value.

SQL/Excel/Power BI Supply Chain Analysis – Oracle. DataCo Smart Supply Chain dataset. Data loaded into Oracle then used SQL to create views to load into Excel. Demand forecasting, ABC/XYZ classes, inventory optimization. Executive dashboards.

Python Financial Analysis – Jupyter Notebook. 10 years of market data across 6 assets retrieved via yfinance API. Asset values versus time plotted on line graph. Returns/volatilities/correlations analyses. Long-term and seasonal time series decomposition.

R A/B Testing and Experimentation – RStudio. 10,000 users data simulated/generated 50/50 random assignment to control/treatment. Metrics being conversion rate and time to complete. Measurable differences between groups for metrics.

Python Job Market API Pipeline – VS Code. USAJobs Search API. GitHub actions. 4 stage python script ETL (collect, transform, load, app). 4 Streamlit dashboards updated daily (executive overview, salary analysis, geographic demand, agency analysis).

Python Customer Churn Prediction Model – VS Code. Telco Customer Churn dataset. 5 python notebook pipeline. Preliminary churn analysis. Trained and compared 5 models. Loaded best model to live Streamlit app. App is intuitive. It can be used via the link.

Julius AI Health Data Analysis – CDC U.S. CDI dataset. Uploaded CSV, then conducted 6 analyses via natural language prompts. Diabetes by state, asthma by race, inactivity/heart-disease correlation, mental health by gender, smoking by race, obesity trend.
