SUMMARY

Mathematics graduate and Google-certified data analyst with 1,500+ hours of analytical instruction experience transitioning into data analytics. Proven ability to diagnose complex problems, communicate findings clearly, and deliver end-to-end analytical solutions across SQL, Excel, Python, R, Tableau, and Power BI. Built an 11-project portfolio spanning e-commerce revenue analysis, supply chain forecasting, A/B testing, cohort retention, financial risk modeling, and automated ETL pipelines. Seeking a data analyst role where quantitative rigor and cross-functional communication drive business decisions.

TECHNICAL SKILLS

SQL & Databases:	Oracle SQL, BigQuery, MySQL, SQLite • CTEs, Window Functions, DDL/DML, Stored Procedures, Views
Spreadsheets:	Excel (Power Query, Power Pivot, Solver, Dynamic Arrays, DAX), Google Sheets
BI & Visualization:	Power BI (DAX, Star Schema, RLS), Tableau, Looker Studio, Data Storytelling
Programming:	Python (pandas, NumPy, statsmodels, scikit-learn, matplotlib, Streamlit), R (tidyverse, ggplot2)
Other:	Git/GitHub, GitHub Actions, API Integration, ETL Pipelines, A/B Testing, Jupyter Notebooks

PORTFOLIO PROJECTS

Supply Chain Analytics — Oracle SQL · Excel · Power BI

End-to-end supply chain solution on 180K orders: Oracle stored procedures with DBMS_SCHEDULER nightly automation, Power Query ETL with five custom M functions, ABC/XYZ inventory classification, ETS and WMA demand forecasting with error metric comparison, 6-month MRP net requirements simulation, and a 6-page Power BI dashboard with DAX measures, star schema data modeling, and forecast write-back to Oracle validated end-to-end with zero variance across 42 rows.

SQL E-commerce Revenue & Returns Analysis — BigQuery

Analyzed 1M+ e-commerce order records using CTEs, window functions (ROW_NUMBER, RANK, LAG/LEAD), complex multi-table joins, and aggregate functions to surface revenue drivers, return risk patterns, geographic sales distribution, seasonal purchasing behavior, and profit margin opportunities — each section culminating in actionable business recommendations.

SQL Data Cleaning & Transformation — MySQL

Cleaned and transformed 56K+ Nashville housing records using DDL/DML operations, self-join updates for missing address population, ROW_NUMBER-based deduplication, STR_TO_DATE type conversions, whitespace trimming across 10 text columns, reusable views, performance indexes, and a stored procedure encapsulating the entire five-step cleaning pipeline.

Excel Sales Dashboard — Superstore Dataset

Built a refreshable Power Query ETL pipeline, developed KPIs with XLOOKUP and SUMIFS, performed pivot table analysis across 9,994 orders and \$2.3M in sales, and designed an interactive executive dashboard with slicers enabling dynamic filtering by region, category, and customer segment to explore profitability trends and high-return-rate products.

Tableau — Olist Marketplace Ops & CX

Multi-dashboard Tableau analysis of 99K+ Brazilian e-commerce orders across 8 relational tables: built KPI cards for delivery time, completion rate, and late delivery rate, created calculated fields and reference lines, designed trend charts, histograms, and status breakdowns, and published 3 interactive analytical dashboards to Tableau Public.

Power BI — CDC Chronic Disease Analytics

Designed a normalized star schema with one fact and four dimension tables, built a complete Power Query ETL pipeline, authored 10 DAX measures including RANKX, DATEADD, and ALLEXCEPT for state rankings, time intelligence, and demographic disparity calculations, and created interactive dashboards tracking 9 chronic disease topics across 52 U.S. locations.

Python — Financial Portfolio Analysis

Retrieved 10 years of daily market data for 6 diversified assets via the yfinance API; computed risk-adjusted metrics (Sharpe ratio, maximum drawdown, Value at Risk), analyzed cross-asset correlations, performed seasonal decomposition, and built an ARIMA baseline forecast with confidence intervals using pandas, statsmodels, and scikit-learn in Jupyter.

R — A/B Testing & Experimentation

Built a 7-script experimentation pipeline on 10K simulated SaaS users: verified randomization with SRM and covariate balance checks, ran hypothesis tests with confidence intervals and effect sizes, validated via bootstrap and permutation inference, refined estimates with regression adjustment using robust standard errors, and assessed statistical power.

Looker Studio — Cohort Retention Analysis

Wrote BigQuery SQL to build monthly acquisition cohorts from the thelook_ecommerce dataset, then delivered an interactive Looker Studio dashboard covering retention matrices, revenue retention curves, acquisition channel comparisons, lifecycle segmentation into Active/At-Risk/Churned stages with reactivation detection, and cumulative lifetime value by cohort.

API Pipeline — Federal Job Market Analytics

Automated end-to-end Python ETL pipeline: collected federal job postings from the USAJobs API with pagination and retry logic, flattened nested JSON into a normalized 23-column SQLite database with upsert deduplication, scheduled daily runs via GitHub Actions, and deployed a multi-page Streamlit dashboard with Plotly charts on Streamlit Community Cloud.

Julius AI — CDC Health Data Exploration

Explored 800K+ rows of CDC Chronic Disease Indicators data entirely through natural language prompts in Julius AI: investigated diabetes trends, asthma racial disparities, physical inactivity vs. cardiovascular mortality correlations (Pearson $r=0.72$), mental health gender gaps, tobacco use patterns, and obesity trends — with a critical tool evaluation.

PROFESSIONAL EXPERIENCE

Math Tutor & Instructor

Mr J's Academy · Wyzant · Blue Train College Prep · Private Clients

2016 – 2025

Delivered 1,500+ hours of math instruction spanning Algebra through Calculus across private schools, online platforms, and independent clients. Maintained a 4.8-star rating on Wyzant across 91 hours of 1-on-1 sessions. Completed 130 hours of classroom lecturing at Dos Pueblos High School through UCSB's education pre-professional program. Diagnosed individual learning gaps and tailored lesson plans to consistently improve student outcomes in standardized testing and coursework.

Assistant Lab Technician

Escape Communications

Summers 2017 – 2023, 2025

Calibrated precision lab instruments, tested and assembled electronic products, and managed inventory tracking through internal item management software. Developed working proficiency with Excel for data entry, reporting, and basic analysis.

EDUCATION & CERTIFICATIONS

B.A. in Mathematics — University of California, Santa Barbara

Minor: Secondary Mathematics & Science Education • GPA: 3.4

Single Subject Teaching Credential Coursework (Mathematics) — California State University, Long Beach

GPA: 4.0

Google Data Analytics Professional Certificate — Coursera
